

Pallas-Yllästunturin kansallispuisto | Pallas-Yllästunturi National Park

TOBE Low Carbon

The TOBE Low Carbon project is calculating and reducing the carbon footprint of Pallas-Yllästunturi National Park together with local partner companies.

Pallas-Yllästunturi National Park and partner companies are applying together for ISO certificate to reduce their carbon footprint. Parks & Wildlife Finland is involved in the project with CAPE Lapland Oy, Harriniva Oy, Hiihtokeskus Iso-Ylläs Oy, Jounin Kauppa Oy, Oy Levi Ski Resort Ltd and Safartica Oy.

The project creates long-term plans to reduce the carbon footprint. The goal is to make the Pallas-Yllästunturi National Park and its surroundings more environmentally friendly travel destination.

The European Regional Development Fund finances the project "Sustainable Growth and Jobs 2014-2020 Finnish Structural Fund" program.
